

SIEMENS

SIMADYN D Control System

Catalog DA 99 • 1999

**Motors and
units for
variable-speed
drives are
included in the
following
catalogs:**

DA 12	DC Motors for Variable-Speed Drives
DA 21	SIMOREG Chassis Converters for Variable-Speed DC Drives
DA 22	SIMOREG Static Converters Systems for Variable-Speed DC Drives
DA 45	SIMOVER PM Modular Converter Systems for Multi-Motor Drives
DA 47	Reluctance Motors Synchronous Motors for Variable-Speed DC Drives
DA 48	SIEMOSYN Motors Synchronous Motors for Variable-Speed DC Drives
DA 62	SIMOVER A Current-Source DC Link Converters for Variable-Speed DC Drives
DA 64	MICROMASTER Voltage-Source DC Link Converters, MIDIMASTER for Variable-Speed DC Drives
DA 65	SIMOVER MASTERDRIVES Voltage-Source DC Link Converters for Variable-Speed DC Drives
DA 66	SIMOVER P Voltage-Source DC Link Converters for Variable-Speed DC Drives
DA 94	SITOR Semiconductors-Protection Fuses for Variable-Speed Drives
DA 99	SIMADYN D Control System for Variable-Speed Drives

Year 2000 compatibility

Further information regarding year 2000 compatibility of our products and systems can be found in the appendix of this catalog.

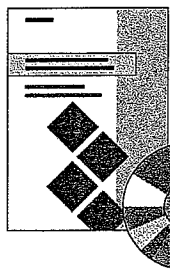

SIEMENS

SIMADYN

SIMADYN D Control System

Catalog DA 99 · 1999

Supersedes:
Catalog DA 99 · 1995

The products listed in this catalog
are also available from
the CD-ROM Catalog CA 01.

Order No.:
E86060-D4001-A100-A8-7600

For further information
contact your local
Siemens representative.

Introduction

Subracks

CPU modules, 32 bit

Communication buffer memory modules

Input/output modules

Communication modules

Technological components for
MASTERDRIVES, DC-MASTER, SRT400

Interface modules

Cables and connectors for
interface modules

Programming devices,
operator control devices

Components of the 16-bit system

Configuring examples

Configuring software

FM 458
SIMATIC application module
